

OLYMPIA AGALIOTI-PSYCHIATRIST

I graduated from the medical school of Aristotle University of Thessaloniki (2009). Following that, I went to Kefallonia where I completed my rural medical service at Kefallonia General Hospital (2009-2010). Upon completion, I arrived at United Kingdom where I completed my speciality in General Adult Psychiatry, with sub-specialization in Rehabilitation Psychiatry (West Middlesex University Hospital, London, 2011-2018). Between 2018-2024 I worked as Consultant Psychiatrist at mental health units in Cambridge and London. In 2024 I returned to Greece and have co-operated for two years with the Neuropsychiatric Clinic Athina in Athens (2024-2026).

I have been trained in a wide range of mental health fields, including old age psychiatry, general adult psychiatry, child and adolescent psychiatry, perinatal psychiatry and eating disorders. I have got clinical experience in cognitive/behavioural and psychodynamic psychotherapy. I have obtained two post-graduate degrees in health service improvement and management (University of Hertfordshire 2014 & Anglia Ruskin University 2021).
